You should be getting a statement from Tony Biancini any minute with a statement that we want to put on the website regarding the restrictions to navigation.

Stan,

No comments on this weekly status report. However, in the next report could you update the blue text to discuss what has been determined in regards to the turbidity data.

Also, not sure it fits for a weekly status report, but is there somewhere logical on the website where you can add a note to in-river users that is similar to the message you relayed to the boat clubs and high school rowers.

Thanks in advance,

Jennifer LaPoma

Subject: Re: RM 10.9 Removal Action Weekly Status

In preparation for our conference call, attached are:

- draft minutes from last week's teleconference
- an agenda for Wednesday's new teleconference
- a schedule for planned in river activities through mid-May
- a diagram showing how the panels are being laid out
- a sketch of a new shroud being constructed to improve the tautness of the fabric as it is being laid, and
- a proposed status report for the www.rm109.com website.

We look forward to discussing all of this in Wednesday's call.
